

LPPM Responsible Metal Compliance Report for 2022 for:

Rustenburg Platinum Mines Limited

Table 1: REFINER's DETAILS	
Refiner's name	Rustenburg Platinum Mines Limited (RPM) a wholly owned subsidiary of Anglo American Platinum Limited (Amplats)
Entities and locations	Please refer to addendum Table 5. RPM is creating this Compliance Report on behalf of its Process locations listed in this addendum
Reporting year-end	31 December 2022
Date of Report	31 March 2023
Senior Management at RPM responsible for this report:	Craig Miller, Chief Financial Officer craig.miller@angloamerican.com
<p>Anglo American Platinum (Amplats), through its wholly owned operational subsidiary, Rustenburg Platinum Mines Limited (registered in 1931), operates a Process Division which includes primary smelting and refining operations. The Process Division predominantly services Amplat's own precious metals mining operations in South Africa and Zimbabwe as well as other platinum primary miners within South Africa.</p> <p>Amplats is a JSE Listed company focusing on extracting value from all precious and base metals which are mined in a safe, smart and responsible way. Amplats continues to focus on sustainability which was acknowledged internationally during 2022 when Amplats was ranked top among the five main peers in the Platinum and Precious Metals sector by the FTSE Russell. Amplats remains a constituent of the FTSE4Good Index Series, the FTSE/JSE Responsible Investment Index, the FTSE/JSE Responsible Investment Top 30 Index, as well as maintaining our position in the Bloomberg Gender Equality Index. The company's ESG ratings are commendable, with improvements noted from global ESG ratings, namely MSCI and Sustainalytics. Our S&P global ESG score improved in 2022 and we were included in the S&P Global Yearbook. Our CDP climate submission received an A-rating and our water submission was assessed at a B level. The focus is further reflected with Unki Mine, Amplats' Zimbabwean operation, being IRMA 75 accredited. With 26,000 employees, Amplats holds a leading position in its global markets.</p> <p>This RPM Compliance Report demonstrates compliance of all metal products with the London Platinum and Palladium Market (LPPM) Responsible Sourcing Guidance Version 4. RPM is also compliant with the London Bullion Market Association (LBMA) and London Metals Metal Exchange (LME) responsible sourcing guidance's.</p> <p>The Report covers the selected processing operations mentioned in addendum Table 5, that belong to the operating company Rustenburg Platinum Mines. It covers the precious metals (PGM) platinum, palladium, rhodium, iridium, ruthenium plus gold and the base metals (BM) nickel, copper and cobalt which are the Metal Accounting Metals.</p>	

Amplats LPPM Compliance Assessment

Table 2: Summary of activities undertaken to demonstrate compliance
Step 1: Establish strong company management systems
<p>Compliance statement: We have fully complied with Step 1: Establish strong management systems, as described below.</p>
<p>1. Has the refiner adopted a company policy regarding due diligence for supply chains of Metal Accounting Metals?</p>
<p>Comments and demonstration of compliance: Our supply chain processes, summarized in our Metal Sourcing Policy, are based on our Values in our Code of Conduct as well as our Business Integrity Policy and Authority Policy. Responsible sourcing of metal inputs is an integral part of our responsibility-conscious management structure.</p> <p>Amplats sources material from South Africa and its own IRMA-75 operation in Zimbabwe. Its policies ensure that full screening of all material sources occurs and is continually monitored in accordance with the implemented governance structures.</p>
<p>2. Has the refiner set up an internal management structure to support supply chain due diligence?</p>
<p>Comments and demonstration of compliance: An internal management structure has been set up that defines governance, roles and responsibilities, internal audit, communication and senior management reviews. An assigned Metal Sourcing Compliance Officer, appointed during 2019, has access to the Platinum Management Committee (PMC) to report any breaches of policy or sourcing guidance.</p>
<p>3. Has the refiner established a strong internal system of due diligence, controls and transparency over Metal Accounting Metals supply chains, including traceability and identification of other supply chain actors?</p>
<p>Comments and demonstration of compliance: RPM has a sophisticated and robust integrated metal accounting system which track's inputs and outputs from each Process operation on a lot basis for all nine PGMs and BMs. Specific documentation is required with each receipt from authorized parties and the receipt must be entered into the metal accounting system prior to the material entering an operation. This allows us to ensure that all PGMs and BMs containing materials used for our products are quantified, conflict free and that we adhere to the requirements of the South African Precious Metals Act. Through training of our employees, we ensure that our guidelines are followed. Any form of non-compliance is reported to the Compliance Officer and senior management. Remedial actions are implemented to address any non-compliance issues. No such escalation was necessary during the reporting period.</p>
<p>4. Has the refiner strengthened engagement with Metal Accounting Metal supplying counterparties and, where possible, assist Metal Accounting Metal supplying counterparties in building due diligence capacities?</p>
<p>Comments and demonstration of compliance: RPM ensures that it has strong relationships with all its metal supplying counterparties. This is done through the various committees built into its supply contracts and continuous engagement with the suppliers. In addition, the source of the supply is defined within each contractual relationship and confirmed annually by each supplier. We further confirm their adherence to the South African Precious Metals Act and their adherence to international practices focusing on child labour, human rights, environmental issues and financial governance.</p>

All new suppliers go through a comprehensive vetting process to ensure that they meet RPM's stringent requirements and that they are suppliers of good standing. No new suppliers were onboarded in 2022.

In the reporting year, we continued to be members of various business organizations like, but not limited to, the IPA (International Platinum Association), ICMM (International Council on Mining and Metals), EPMF (European Precious Metals Federation) and the NI (Nickel Institute).

5. Has the refiner established a company-wide communication mechanism to promote broad based employee participation and risk identification to management?

Comments and demonstration of compliance:

Amplats, has implemented "YourVoice" throughout the company, including its subsidiary RPM, which is an anonymous service through which concerns about potentially unethical, unlawful or unsafe conduct and practices can be reported and investigated. It is independently managed on our behalf by an external service provider. As a means of reinforcing Amplats' values, "YourVoice" serves to build employee, customer, supplier and stakeholder trust through being an important means by which we can identify and eliminate unethical practices. "YourVoice" can be contacted by email or telephonically and contact information is widely publicized throughout our organization and is readily available on our portal.

No concerns were raised by any stakeholder during the reporting period with regards to PGM and BM bearing feed materials.

Step 2: Identify and assess risks in the supply chain

Compliance statement:

We have fully complied with Step 2: Identify and assess risks in the supply chain, as described below:

1. Does the refiner have a process to identify risks in the supply chain?

Comments and demonstration of compliance:

RPM identifies and assesses risks in the supply chain. Our vendor approval process is followed prior to entering a formal relationship with any metal feed supplier and includes extensive checks to ensure that they are aligned with the RPM's stringent good supplier requirement which include compliance with Responsible Sourcing guidelines. Routine checks are also undertaken periodically to ensure that current vendors risk profiles have not changed. As RPM's business is that of primary smelting and refining, our supply agreements are usually established as long term supply agreements for primary metal sources. The approval requirements are however applied to all sources of metal feeds and independent of duration of supply.

2. Does the refiner assess risks in light of the standards of their due diligence system?

Comments and demonstration of compliance:

RPM's supply chain due diligence comprises all measures required by the LPPM which are performed before entering into a business relationship with any PGM or BM supplying counterpart. All RPM's current suppliers are situated in non-conflict areas. We would perform enhanced due diligence for secondary sourced materials, where the metal potentially originates from or transits via conflict affected areas or areas with human rights abuse, child labour or other high-risk factors. In addition, we conduct appropriate monitoring of transactions undertaken through the course of the relationship.

RPM might suspend its business relationship with existing partners or refuse to open a relationship with new partners should the due diligence requirements not be met.

There were no new relationships formed or current relationships suspended during the reporting period.

3. Does the refiner report risk assessments to the designated manager?

Comments and demonstration of compliance:

Amplats' supply chain due diligence needs to be completed prior to a relationship being entered into by its subsidiary RPM. Our Authority Policy Manual clearly defines the level of senior management required to authorize such a relationship and requires at least one Executive Head's approval. All our current counterparties have full PMC and RPM Board approval. The Compliance Officer can raise any concern when reviewing business conducted with current suppliers to the PMC and, if required, recommend that the relationship be suspended.

No risks were identified resulting in no current relationships being suspended during the reporting period.

Step 3: Design and implement a management strategy to respond to identified risks

Compliance statement with requirement:

We have fully complied with Step 3: Design and implement a management system to respond to identified risks, as described below:

1. Does the refiner report findings to designated Senior Management?

Comments and demonstration of compliance:

Amplats' supply chain due diligence needs to be completed prior to a relationship being entered into by its subsidiary RPM. Our Authority Policy Manual clearly defines the level of senior management required to authorize such a relationship and requires at least one Executive Head's approval. All our current counterparties were approved by the PMC and the RPM Board. The Compliance Officer can raise any concern when reviewing current suppliers to the PMC and, if required, recommend that the relationship be suspended.

No concerns were raised during the reporting period.

2. Has the refiner devised a strategy for risk management of an identified risk be either (i) mitigation of the risk while continuing trade, (ii) mitigation of the risk while suspending trade or (iii) disengagement from the risk?

Comments and demonstration of compliance:

Amplats' supply chain due diligence needs to be completed prior to a relationship being entered into by its subsidiary RPM. In addition, periodic review of current suppliers is undertaken. The Compliance Officer will review these together with any ad-hoc identified risks brought up by any stakeholder and decide on necessary action. If required, this action could include suspending or cancelling a relationship.

No relationships were suspended or cancelled during the reporting period.

3. Where a management strategy of risk mitigation is undertaken, it should include measurable steps to be taken and achieved, monitoring of performance, periodic reassessment of risk and regular reporting to designated senior management.

Comments and demonstration of compliance:

Procedures are in place and are applied accordingly. Should a risk be identified, additional information will be requested for the Compliance Officer to decide on the appropriate action. If required, this action could include recommendation to suspend or cancel a relationship.

No relationships were suspended or cancelled during the reporting period.

Step 4: Arrange for an independent third-party audit of the supply chain due diligence

Compliance statement with requirement:

We have fully complied with Step 4: Arrange for an independent third-party audit of the supply chain due diligence.

Comments and demonstration of compliance:

RPM received an unqualified assurance report without findings of non-compliance for the 2022 period, conducted by RCS Global. The full audit report is available on request. RPM is scheduled for its next audit in Q1 2024.

Step 5: Report on supply chain due diligence**Compliance statement:**

We have fully complied with Step 5: Report on supply chain due diligence as described below:

Comments and demonstration of compliance:

Further information and details of how RPM's systems, procedures, processes and controls have been implemented to align to the specific requirements in the LPPM Guidance has been set out in our metal supply chain policy which is available on Amplats' company portal link here.

RPM's overall conclusion**Table 3: Management conclusion**

Is the refiner in compliance with the requirements of the LPPM Responsible Platinum/Palladium Responsible Sourcing Guidance Version 4 for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas for the reporting period?

Compliance Statement:

Yes Amplats, including its operational subsidiary RPM, have implemented effective management systems, procedures, processes and practices to comply with the requirements of the Guidance for the reporting period ending 31st December 2022. It is further concluded that the implementation is for all the accounting metals namely platinum, palladium, rhodium, gold, iridium, ruthenium, nickel, copper and cobalt.

RPM is committed to continuous improvement and this is monitored internally on a regular basis. Any corrective actions identified are implemented.

Other details**Table 4: Other report comments**

If readers of this report wish to provide any feedback to RPM please contact the Compliance Officer at: Kamal Parbhoo kamal.parbhoo@angloamerican.com

Addendum**Table 5: Relevant for the audit are the following RPM operations**

Operational Name	Processing Step	Location
Mortimer Smelter	Primary smelting	Swartklip, South Africa
Polokwane Smelter	Primary smelting	Polokwane, South Africa
Waterval Complex	Primary smelter and converting	Rustenburg, South Africa
Rustenburg Base Metals Refinery	PGM/BM separation and BM Refining (LME producer)	Rustenburg, South Africa
Precious Metals Refiner	PGM Refining (LPPM GD Status and sponge producer)	Rustenburg, South Africa
